

LESSON 3: FRAMEWORK FOR TODAY.

Content Creation Playbook

Design the content and format and launch it. Set up the schedule, a small budget, and mobile-first audiences. Ask clarifying questions. Prototype the design in a rough draft. Make it accessible, easy to update, and connected to an outcome.

I can show the process, the feedback, and the final result.

LESSON 4: QUALITY AND RESPONSIBILITY

The fraction of the total time of the process, guided by accessibility, and what the output portfolio is. Credit source.

Build a new design case studies, share the process, solve with different design projects, and look for internships, continue the work for

LEARNING OBJECTIVES

LESSON 2: THE DESIGN WORKFLOW

1. Follow a step-by-step process. 2. Set the content in three designs.

3. Apply the following: Figma, Canva, Figma, Google Digital Garage, and NIVOX mentors.

5. Review, export, and quality, accessibility, and ethics checklists.

SUMMARY AND NEXT PATH

PAVLOVA ON THE DESIGNABLE learning loop: understand, practise, test, revise, and publish. Next, combine this skill with Git and c

Create a page for the NIVOX 3.0. Guide to include a clear audience, one message, and a measurable success sign

4. Exercises and assignment 5. Mini project 6. Career path

FREQUENTLY ASKED QUESTIONS

QUESTION: If my foundation is poor? A: Treat it as a diagnostic draft; use feedback to choose the next experiment.

Start with the problem in the discipline. Break it into content. Create a Playbook, define the audience, features that project consists,

Write down what success looks like. Before publishing, use a computer to check decisions, files, and the final output and a README.

ASSIGNMENT TO A MINOR PROJECTS

Read the external portfolio case studies of the Open Source Playbook. Create a glossary and your iteration and ask for feedback on

Save an original source file and an exported copy. Record the file type, size, dimensions, and the reason you chose each setting

CHALLENGE TASK

LESSON 3: A REPEATABLE PROCESS: less time, a smaller screen, a different audience, or a stricter file size.

Brief research sketch first version feedback revision quality check delivery. This sequence protects you from polishing

BEST PRACTICES: Create and produce three rough options before selecting one. Compare them against the brief, not personal pre

" Keep source files organised. " Name versions clearly. " Back up work.

LESSON 4: STEPS BY STEP PERSONALITY. " Explain decisions, not just outputs.

1. Write the user or client goal. 2. Collect two useful references. 3. Break the outcome into small parts.

COMMON MISTAKES: Working version. 5. Test it with a real person. 6. Revise one issue at a time.

Start by writing the brief, copy for examples. Describe the best situation, why, satyping, testing, exporting the wrong format; and presenting
