

LESSON 3: DESIGN WORKFLOW

CSS Layout and Responsive Design

Design a layout, build it, and roll out to users. With a real-world project, you can learn how to design for mobile-first audiences. Ask clarifying questions. Prototype a design, then build it. Make it accessible, easy to update, and connected to an outcome.

I can show the process, the feedback, and the final result.

LESSON 4: QUALITY AND RESPONSIBILITY

The fraction of CSS that is not reusable is a design guide to accessibility, and a design guide to accessibility is a design guide to accessibility. Build a design guide to accessibility, and a design guide to accessibility is a design guide to accessibility.
