

NEEDS SHOWING WORKED EXAMPLE TODAY.

Digital Marketing Essentials

Design a poster for a film festival called 'The Future of Us'. The audience is small budget, up and mobile-first audiences. Ask clarifying questions. Produce the design in a single page. Make it accessible, easy to update, and connected to an outcome. I can show the process, the feedback, and the final result.

LESSON 1: SCOPE AND RESPONSIBILITY

The first step of the process is to define the scope and responsibility of the project. This includes identifying the audience, the message, and the outcome. The second step is to create a brief, which is a document that outlines the project goals, objectives, and constraints. The third step is to create a design, which is a visual representation of the project goals and objectives. The fourth step is to create a poster, which is a final product that can be used to promote the project.

LEARNING OBJECTIVES

LESSON 2: THE DESIGN WORKFLOW

1. Follow a step-by-step process. 2. Set clear goals and objectives. 3. Apply the design workflow. 4. Use the design workflow to create a poster.

3. Apply the design workflow. 4. Use the design workflow to create a poster.

5. Review, export, and quality check the poster.

SUMMARY AND NEXT PATH

PAVING THE WAY: A sustainable learning loop: understand, practise, test, revise, and publish. Next, combine this skill with Git and create a portfolio.

Create a page for a NIVOX 3D printed object. Include a clear audience, one message, and a measurable success sign.

4. Exercises and assignment 5. Mini project 6. Career path

FREQUENTLY ASKED QUESTIONS

QUESTION: Why is my design poor? A: Treat it as a diagnostic draft; use feedback to choose the next experiment.

QUESTION: How do I know if my design is good? A: Define the audience, the message, and the success sign.

QUESTION: How do I know if my design is good? A: Define the audience, the message, and the success sign.

ASSIGNMENT TO A MINOR PROJECTS

Produce a poster for a past study of Digital Marketing Essentials. Create a design and a poster. Ask for feedback from a peer.

Save an original source file and an exported copy. Record the file type, size, dimensions, and the reason you chose each setting.

CHALLENGE TASK

LESSON 3: A REPEATABLE PROCESS: less time, a smaller screen, a different audience, or a stricter file size.

Brief research sketch first version feedback revision quality check delivery. This sequence protects you from polishing.

BEST PRACTICES: Create a poster and produce three rough options before selecting one. Compare them against the brief, not personal preference.

" Keep source files organised. " Name versions clearly. " Back up work.

LESSON 4: STEPS BY STEP PERSONALITY. " Explain decisions, not just outputs.

1. Write the user or client goal. 2. Collect two useful references. 3. Break the outcome into small parts.

4. Create a working version. 5. Test it with a real person. 6. Revise one issue at a time.

Start with a brief, copy for examples. Describe the design situation, why it's important, and the wrong format; and presenting
