

Full-Stack Web Development Roadmap

Start here

1. Learn HTML, CSS, and JavaScript fundamentals.
2. Build small React interfaces and practise reusable components.
3. Add APIs with Node.js and validate every request.
4. Store data safely with Firestore and security rules.
5. Deploy, monitor, and document your project.

Practice challenge

Build a student resource page with search, filters, and a responsive layout.

NIVOX tip: use the hub computers to commit your work to Git regularly.
