

Gemini AI Workflow Guide

I can show the process, the feedback, and the final result.

LEARNING OBJECTIVES

5 Review exports, and quality, and essential changed ethics checklists.

4. Exercises and assignment 5. Mini project 6. Career path

Start with the problem this discipline solves. Get into a workflow & project and learn why the features do what they do. Write down what success looks like before attempting to use a folder with versions, files, or the final notes, and a README.

CHALLENGE TASK

BEST PRACTICES Consider and produce three rough options before selecting one. Compare them against the brief, not personal preference. " Keep source files organised. " Name versions clearly. " Back up work.

COMMON MISTAKES

Stating without the required format; Discuss without the understanding; saying something, reporting the wrong format; and presenting
